

Jacky Chiu

Senior Software Engineer (Backend) Email: jacky.chiu@deltaww.com Mobile: 0909-514-075

Professional Summary

Backend software engineer with over 7 years of experience in enterprise system development, primarily using Java and Spring Boot to build backend services. Experienced in developing financial systems and enterprise management platforms. Currently working at Delta Electronics on a Greenhouse Gas (GHG) Management System, responsible for implementing carbon emission calculation logic, data processing workflows, and system features.

Skilled in PostgreSQL, Spring JPA, and Spring Batch. Experienced in cross-functional collaboration, including working with international students during graduate studies and communicating with the company's North America branch on product requirements.

Technical Skills

Backend Technologies

- Java
- Spring Boot
- Spring Batch
- Spring JPA / Hibernate

Databases

- PostgreSQL
- SQL

System Development

- RESTful API Development
- Batch Processing
- Data Processing / ETL

Development Tools

- Git
- IntelliJ IDEA
- Maven / Gradle

Development Methodology

- Agile / Scrum

Frontend Technologies

- JavaScript
- HTML / CSS
- Frontend and Backend API Integration

Mobile Application Development

Mobile App Feature Development
API Integration for Mobile Applications

Work Experience

Senior Software Engineer (Backend), Delta Electronics, Taipei, Taiwan 2024/06 - Present

Developing a **Greenhouse Gas (GHG) Management System** used for enterprise carbon emission data management and emission calculation.

- Develop backend services using Java and Spring Boot to support core system functionality
- Implement carbon emission calculation logic for different emission sources and calculation rules
- Build data transformation pipelines using Spring Batch to process data from the ESG Data Platform and import it into the GHG system
- Design and maintain database schemas using PostgreSQL to ensure efficient storage and querying of emission data
- Develop reporting data processing and document generation features for carbon emission reports
- Introduced Daily Scrum and Code Review practices to improve information sharing and code quality within the development team

Senior Software Engineer (Backend), WebComm, Taipei, Taiwan 2020/07 - 2024/04

Worked on the development of the **Taishin RichartLife backend system**, responsible for backend feature development and system maintenance.

- Develop and maintain backend services for financial systems supporting mobile banking features
- Collaborate with frontend teams to implement new system features and improve user experience
- Troubleshoot and resolve system issues to maintain system stability
- Participate in requirement discussions and translate business requirements into system functionality
- Lead internal Code Review sessions to improve code quality and development consistency
- Create project documentation and coding guidelines to improve team development efficiency
- Mentor and onboard new team members, helping them understand system architecture and development processes

Software Engineer (Mobile / Frontend), WebComm, Taipei, Taiwan 2017/11 - 2020/07

Participated in the development of the **Taishin Mobile Banking App**.

- Develop and maintain mobile application features supporting mobile banking services
- Integrate the mobile application with backend financial systems to ensure stable data communication between frontend and backend services
- Perform system upgrades and feature enhancements to improve system stability
- Assist in system maintenance and troubleshooting

Product Management Engineer, Lucidity Enterprise co. Ltd, Tainan, Taiwan 2016/11 - 2017/04

Responsible for managing the **new product development process** and **coordinating communication with overseas branches**.

- Track new product development project progress to ensure projects stay on schedule
- Coordinate cross-department collaboration during product development

- Communicate product requirements and development progress with the North America branch to ensure project alignment

Education

Java Cloud Service Development Program - *Institute for Information Industry (III), Taoyuan, Taiwan 2017*

M.S. in Industrial & Manufacturing Engineering - *University of Wisconsin–Milwaukee, USA 2015*

M.S. in Industrial & Systems Engineering - *Chung Yuan Christian University, Taiwan 2014*

B.S. in Industrial & Manufacturing Engineering - *Chung Yuan Christian University, Taiwan 2012*
