

Delta Securemote VPN User Guide For Windows

Corp. ITNetwork

Outline

- **Brief**
- **Work Flow**

- **What's Happening:**

For enhanced security, Delta SSL VPN(GlobalProtect) will be migrating to **Delta CP Securemote VPN.**

- **How this affects you**

- **Multi-Factor Authentication(MFA) with the same way to do**
 - First factor-Password associated with the username(AD account & Password)
 - Additional factors-Push notification, one-time password (OTP), or other factors
- **Install the CP VPN Agent Software into your compliant device**
- **Compliant device** : devices must belong to Delta domains
 - Non compliant device, restrict to Delta WEB VPN+VDI only
 - IT suggest that don't use personal PC/NB to login to Delta CP VPN

- Step 1: Setup Multi-Factor Authentication(MFA)
 (If you have installed and configured Microsoft MFA. Skip to Page 10)
- Step 2: Get the Securemote VPN agent software
- Step 3: Configure and Run Securemote VPN

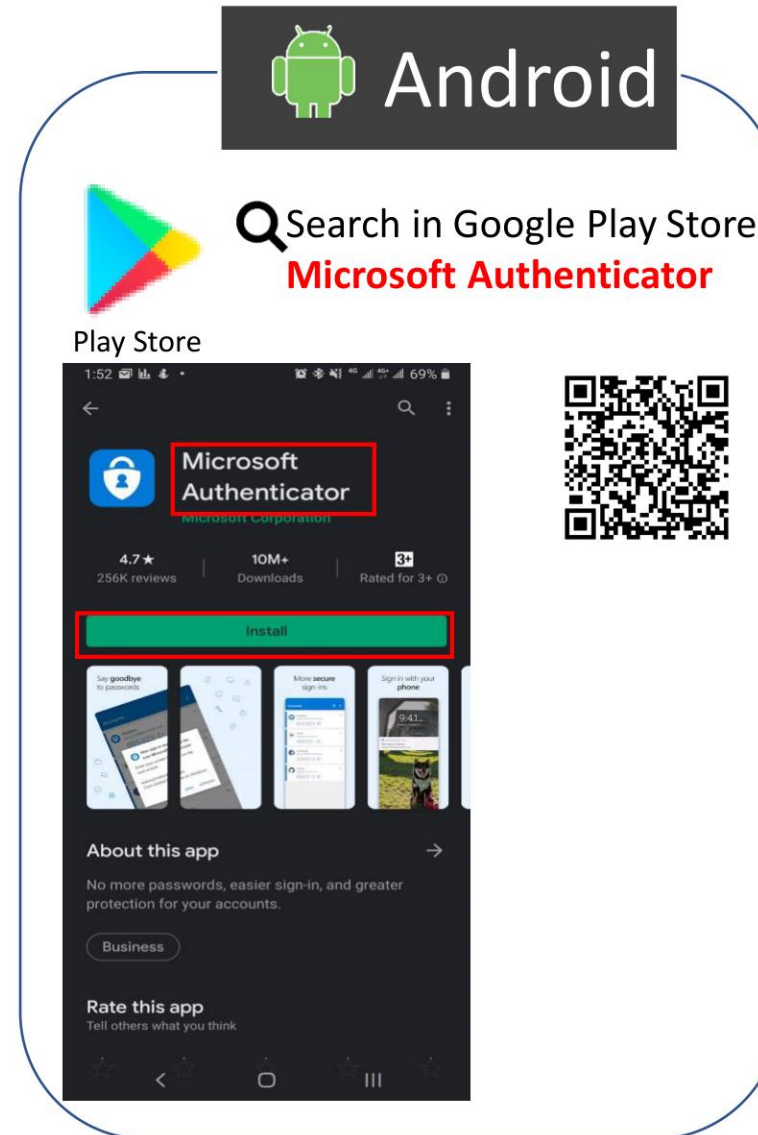

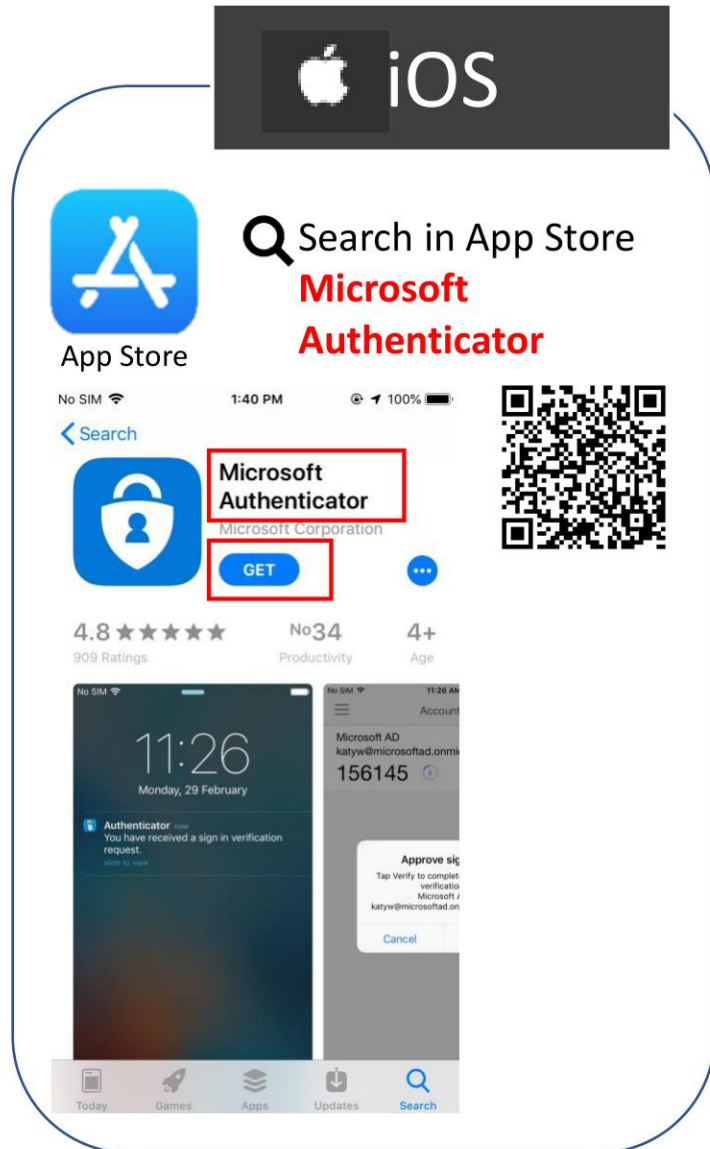

If you have installed and configured Microsoft MFA. Skip to Page 10.

Step 1 : Setup Multi-Factor Authentication(MFA)

Multi-Factor Authentication is two-step verification solution for security

(How to enable MFA> <https://itkm.deltaww.com/detail/650116841f11960001b26335?kblang=2>)

Download MFA app

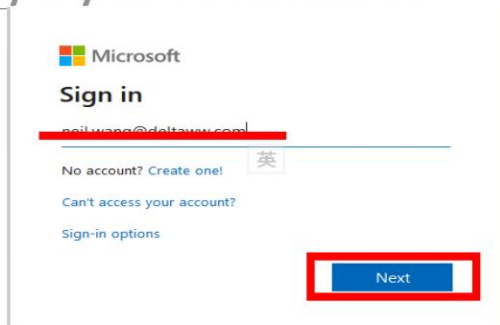

In China, Android users must download apps through local app stores

E.g

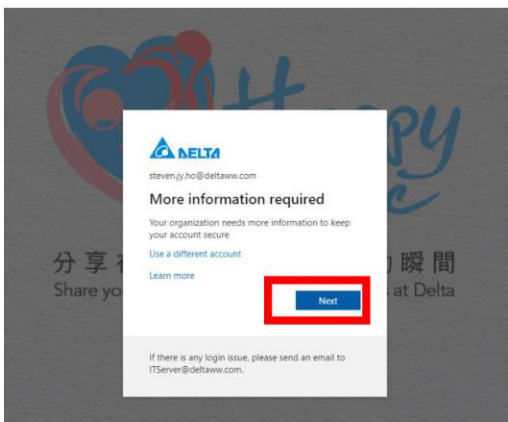

- [聯想](#)
- [Huawei](#)

- On laptop, access the <https://aka.ms/MFASetup> by browser
- Key in your e-mail address

Setup security verification with Microsoft Authenticator APP

1) Select **Mobile APP**

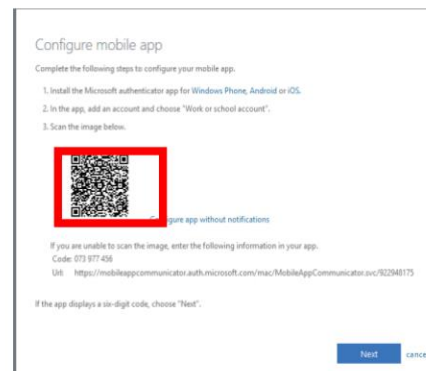

Step 1: How should we contact you?
Mobile app
How do you want to use the mobile app?
☐ Receive notifications for verification
☒ Use verification code
To use these verification methods, you must set up the Microsoft Authenticator app.
Set up Please configure the mobile app.

2) Open **Authenticator APP**, **Add account (+)**, **Choose work or school account**

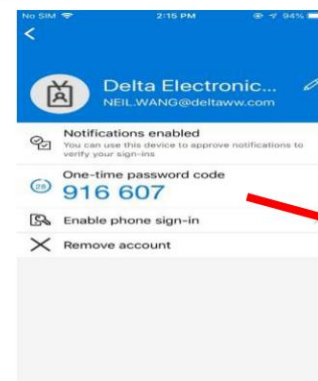

3) Scan the web QR code

Configure mobile app
Complete the following steps to configure your mobile app.
1. Install the Microsoft authenticator app for Windows Phone, Android or iOS.
2. In the app, add an account and choose "Work or school account".
3. Scan the image below.
Scan the QR code to add your account without notifications.
If you are unable to scan the image, enter the following information in your app.
Code: 973 877 458
URI: https://mobileappcommunicator.auth.microsoft.com/mca/MobileAppCommunicator.svc/92340175
If the app displays a six-digit code, choose "Next".
Next cancel

4) Key in the verification code from the mobile app and complete Activation

Additional security verification

Secure your account by adding phone verification to your password. View video to know how to secure your account

Step 2: Enter the verification code from the mobile app

Enter the verification code displayed on your app
768409

Additional security verification

- 1) Select Country code , key in mobile phone number

Additional security verification

Secure your account by adding phone verification to your password. View video to know how to secure your account

Step 3: In case you lose access to the mobile app

Taiwan (+886) 975163123

- 2) You will get a call, Instruct you to press # for verification.
The following picture is the management page

Additional security verification

When you sign in with your password, you are also required to respond from a registered device. This makes it harder for a hacker to sign in with just a stolen password. View video to know how to secure your account

what's your preferred option?

We'll use this verification option by default.

Use verification code from app

how would you like to respond?

Set up one or more of these options. Learn more

☒ Authentication phone Taiwan (+886) 975163123
☐ Office phone 112-5427
☐ Alternate authentication phone
☒ Authenticator app or Token Set up Authenticator app
Authenticator app - SM-N960F Delete

Microsoft

Change prefer verification option

- 1) Select Notify me through app , press save 2) Verify process

what's your preferred option?

We'll use this verification option by default.

Use verification code from app
Call my authentication phone
Text code to my authentication phone
Call my office phone
Notify me through app
Use verification code from app or token

☐ Alternate authentication phone Select your country or region

☒ Authenticator app or Token Set up Authenticator app

Authenticator app - 王聖中's iPhone Delete

Authenticator app - SM-N960F Delete
